OCTO FINISSIMO TATOO ARIA
COPPOLETTA DESIGNS X BVLGARI

BVLGARI Octo Finissimo Tattoo Aria combines the art of tattooing with the art of mechanics.

Since its release on the market, the Octo Finissimo has always been considered as a second skin thanks to its thinness and lightness.

This limited edition is the result of watchmaking and design combined together.

The Octo Finissimo Tattoo Aria watch is a limited series, exclusive to Parisian Retailer Chronopassion, and produced in only 10 pieces.

OCTO FINISSIMO TATOO ACQUA
COPPOLETTA DESIGNS X BVLGARI

When the art of mechanical precision meets the art of tattooing.

A merging of art forms to transcend them through powerful synergies, paying tribute to the power of the sea.

The second opus in a series dedicated to the natural elements, the Octo Finissimo Tattoo Acqua slips into the depths to emerge with a tattoo of waves, the face of the most primeval, powerful and untameable forces of the oceans.

A singular edition of only 30 pieces.

OCTO FINISSIMO TATOO FUOCO
COPPOLETTA DESIGNS X BVLGARI

For this final act, the canvas is rose gold. I wanted to express the warmth, you might even say opulence of this metal through a flame motif and voluptuous forms that contrast with the linearity of the case and bracelet.

Thus 'Fuoco', with all its visual, compelling power, came into being.

A singular edition of only 15 pieces.

ROMAIN JEROME

A SAILOR'S GRAVE
COPPOLETTA DESIGNS X ROMAIN JAROME

A tribute to the tattoo art and to maritime legends through a resolutely contemporary and provocative collection.

The Tattoo-DNA collection embodies a new legend, that of the "sailor's grave".

The models in the Tattoo-DNA collection are issued in 25-piece limited series per version.

The various stamped, engraved and decorated silver decorative elements lend an impressive sense of depth to the dial, which features a scene in which the elements are unleashed.

Air, earth and sea appear to be threatening to engulf the boat.

The anchor plays a predominant role on the dial in order to ward off bad luck and protect this ship caught up in a storm.

The bolts of lightning flashing across the sky are red and yellow lacquered according to the versions and enhanced with superluminova green emission.
